

rubiflex S XG27BI

HexArmor® + uvex

The liquid- and chemical-resistant HexArmor® rubiflex S XG27BI glove combines protection and grip with excellent comfort and flexibility – featuring an innovative XG foam nitrile coating and additional impact protection.

In addition to the comfortable wearing properties, the lightly tricotted chemical protection also offers good protection against a wide range of chemical and mechanical risks. Thanks to the flexible IR-X® Impact Exoskeleton™ with high-flex design on the back of the hand, it protects against crush, smash, and pinch hazards and ensures good visibility.
