\*as per annex of the EU Cosmetics Directive

# **PRODUCT PROPERTIES / APPLICATION AREA:**

The oil-in-water emulsion contains a combination of natural oils which balance the lipid loss of stressed skin. Sallow-thorn reduces redness and in combination with tocopherol, it provides a sufficient potential for antioxidation. Thus, the skin is effectively protected from environmental stresses. The combination of triglycerides taken from the olus oil, rice germ oil, sunflower oil and shea butter provides a film-forming emulsion on the skin. Therefore, the skin remains smooth and nourished, even when being exposed.

In order to prevent the very high trans-epidermal water loss which often occurs when the skin is stressed, CARE PURE contains essential fatty acids. In the present concentration, linoleic acid provides a good water balance in the upper skin layer.

Just when the stratum corneum is optimally supplied with water, it remains elastic and additionally provides an improved mechanic resistance capability of the skin.

CARE PURE is free from perfume, fragrances and preservatives\* and is also suitable for the food industry.

# **APPLICATION:**

Apply CARE PURE carefully on the clean and dry skin. Rub in the cream evenly, paying particular attention to vulnerable areas such as between the fingers and around the nails.
