

## Skin protection - before work against UV radiation

Protection Class	SPF
low	6 - 10
medium	15 - 25
high	30 - 50
<b>very high</b>	<b>50 +</b>

# PHYSIO UV 50 PLUS

Very water-resistant light and sun protection cream for outdoor work under extreme conditions, for welding or for handling photosensitizers.

- yellowish and rich O/W emulsion
- very high protection with SPF 50+
- protection against UVC radiation
- very water-resistant
- for special requirements
- with vitamin E
- perfume- and fragrance-free
- optimized UV filters
- vegan 🌿

## PHYSIO UV 50 PLUS

### PRODUCT PROPERTIES

- yellowish and rich O/W emulsion
- very high protection with SPF 50+
- protection against UVC radiation
- very water-resistant
- for special requirements
- with vitamin E
- perfume- and fragrance-free
- optimized UV filters
- vegan 🌿

### PLEASE NOTE

The application of UV protection agents does not exonerate from the application duty of other prescribed precautionary measures. Intensive midday sun should be avoided. Even UV protection agents with a high SPF do not provide complete protection against UV radiation.

AVOID CONTACT WITH TEXTILES TO PREVENT PERMANENT STAINING!

### DESCRIPTION

PHYSIO UV 50 PLUS is a very water-resistant skin protection cream against natural and artificial UV radiation, which provides very high protection (SPF 50+). Actually, an SPF of more than 60 has been determined. The modern UV filter protection system on the basis of a balanced combination of water-soluble, oil-soluble and particulate filters is light-resistant and provides very efficient protection against UVC radiation. Nevertheless, the formulation is pleasant and absorbed quickly. PHYSIO UV 50 PLUS is suitable for work places with special requirements, e.g. when handling photosensitizers, for electric welding or in case of outdoor work under special conditions (heat, wetness). PHYSIO UV 50 PLUS is very water-resistant and, thus, even maintains the light protection when sweating or when working in an aqueous environment. Vitamin E contributes to cellular protection against oxygen radicals which evolve under UV light.

### APPLICATION

Before work or rather before intensive light exposure, apply PHYSIO UV 50 PLUS evenly on the dry and clean skin. The amount of cream to use depends on the application surface, e.g. a hazelnut-sized amount of cream for the hands. Apply generously as small amounts only offer low protection. In order to maintain the UV protection, apply several times. Especially after washing, the application of PHYSIO UV 50 PLUS must be repeated. However, the renewed application does not extend the period of protection, but rather re-establishes the old protection status which has diminished in the meantime. Principally, PHYSIO UV 50 PLUS should be reapplied every two hours. A product evaluation sheet can be downloaded.

## PHYSIO UV 50 PLUS

### DERMATOLOGICAL COMPATIBILITY

The good dermatological compatibility of PHYSIO UV 50 PLUS has been carefully tested and proven. A printed certificate is available.

### COATING COMPATIBILITY

Coating-compatibility test summaries according to the norms of leading automotive manufacturers are available. However, since these tests are not standardized, we recommend our customers to conduct their own tests on coating compatibility, at any rate.

### EFFICIENCY TEST

The efficiency of PHYSIO UV 50 PLUS has been proven with regard to:

1. UVA and UVB protection factor in vivo according to international norm EN ISO 24444 (1)
2. UVC protection factor referring to ISO 24443 (2)
3. Water resistance according to COLIPA method of the EU cosmetics manufacturers (3)

#### 1. Protection factor and sunburn prevention

The UVB protection factor mainly avoids the occurrence of sunburn caused by sun exposure and was formerly the only quality criterion of sunscreens. The sun protection factor (SPF) indicates how much longer you can stay in the sun without getting a sunburn while using the sun protection product, in comparison to the time you could spend in the sun without sunscreen. The SPF is affected by various factors, such as the skin type, the environment (e.g. altitude, latitude, time of the year and time of day) as well as the amount of product applied. The average protection factor evaluated for PHYSIO UV 50 PLUS is 60.1.

#### 2. UVA protection factor (UVAPF) against skin aging and light allergies

The UVAPF has to be at least 1/3 of the product's protection factor. UVA radiation penetrates deeper into the skin and is the main reason for light-induced skin aging and different forms of so called „sun allergies“. The wavelength of the sun's UV spectrum is 290 – 400 nm, the UVA spectrum is 320 – 400 nm, the UVB spectrum is 290 – 320 nm. Modern sun protection agents cover even a wider UV range and especially the UVA range becomes more and more important. The UVA protection factor (UVAPF) evaluated for PHYSIO UV 50 PLUS is 21.2. Thus, the UVA-UVB ratio is 0.35 and the product fulfils the requirements for balanced sun-screen products (UVA-UVB ratio >0.33).

#### 3. UVC protection factor e.g. for welding

Natural UVC radiation is blocked by the ozone layer. However, UVC radiation emerges from other sources as well, e.g. from welding. The UVC protection factor is evaluated referring to ISO 24443, which determines the evaluation of the UVA protection factor. PHYSIO UV 50 PLUS has a very high UVC protection factor.

#### 4. Very water-resistant

The water resistance according to the European industry standard COLIPA is evaluated by means of a realistic and controlled bathing test (4 times, 20 min. each). After bathing, the SPF needs to be at least 50 % and, thus, maintain sufficient protection in case of e.g. sweating or bathing. For PHYSIO UV 50 PLUS an average of 56.0 % has been evaluated.

Nevertheless, PHYSIO UV 50 PLUS should be re-applied especially after bathing or sweating in order to increase the sun-protection safety.

## PHYSIO UV 50 PLUS

### PRODUCT QUALITY

The product is manufactured according to GMP (GOOD MANUFACTURING PRACTICE) requirements. The bacteria count is microbiologically tested on a regular basis and is under 100 bacteria per gram.

### FIRST AID

If PHYSIO UV 50 PLUS accidentally gets into your eyes, rinse immediately with plenty of lukewarm water. If a burning sensation still persists, consult an eye doctor as measure of precaution.

### STORAGE INSTRUCTIONS

PHYSIO UV 50 PLUS will keep for at least 30 months (from date of manufacture) if stored unopened at room temperature in the original packaging. The Period After Opening (PAO) is indicated on each tube.

### STATUTORY REGULATIONS

PHYSIO UV 50 PLUS is subject to the EU Cosmetics Regulation, but not to the German Chemicals Act or the Hazardous Substances Order. Moreover, skin protection products are received as part of the Personal Protective Equipment (PPE).

### ENVIRONMENT

All tubes are made of polyethylene and after being completely emptied, they can be disposed of with other polyethylene waste. Packaging is labeled accordingly.

### INGREDIENTS

AQUA, C12-15 ALKYL BENZOATE, DIETHYLAMINO HYDROXYBENZOYL HEXYL BENZOATE, ETHYLHEXYL SALICYLATE, ETHYLHEXYL TRIAZONE, DICAPRYLYL ETHER, GLYCERIN, CETEARYL ALCOHOL, GLYCERYL STEARATE, BIS-ETHYLHEXYLOXYPHENOL METHOXYPHENYL TRIAZINE, TITANIUM DIOXIDE (NANO), SODIUM STEAROYL GLUTAMATE, PHENYLBENZIMIDAZOLE SULFONIC ACID, BUTYROSPERMUM PARKII BUTTER, SILICA, ACRYLATES/C10-30 ALKYL ACRYLATE CROSSPOLYMER, SODIUM HYDROXIDE, CAPRYLYL GLYCOL, DECYLENE GLYCOL, TOCOPHERYL ACETATE, ETHYLHEXYLGLYCERIN, PIROCTONE OLAMINE, TITANIUM DIOXIDE, SILVER CHLORIDE.
